

Shipping to amazon

Let's ensure that Amazon will accept your shipment

**When you take good care of preparing your goods, you will
experience 90% less delays, damages and losses**

Which type of pallets can I ship to Amazon?

→ For amazon warehouses in the **United Kingdom**, you are required to use **block pallets**.

The dimensions for these pallets are 100 x 120 cm.

→ For all the other countries within Europe, you are required to use **europallets**.

The dimensions for these pallets are 80 x 120 cm.

→ All pallets - no matter the destinations - need to be of good quality.

Pallets with broken or missing planks are likely to get rejected.

DO NOT paint the pallets. The pallets are required to be in the natural wooden color.

"Easy to order, on time and great communication with regards to Amazon shipments"

Martin - Luxorb.eu

How to stack pallets?

- All FBA labels on the goods are required to face outside. Amazon needs to be able to scan these.
- There can only be 1 FBA number per pallet. Every FBA number requires its own pallet.
- Double stacked pallets may get refused. This is at your own risk.
- No items are allowed to stick out. Everything needs to remain within the dimensions of the pallet.
- Shipments are NOT allowed to exceed 180 cm in height. This is including the pallet.
- The maximum weight per pallet is 500kg.

Quicargo exclusively works with 'preferred Amazon carriers'

How to seal pallets?

→ The pallets are required to be sealed with **transparent wrapping material**.

→ Every corner of the pallets is required to be sealed at least **three times**.

→ The shipment needs to be completely sealed, **pallet included**.

→ Do **NOT** use the wrapping material to create knots.

"Putting in orders is fast and you can do it 100% online. Great when you have little experience!"

Pina - Makro

How should the truck be loaded?

→ All pallets are required to be loaded in the length of the trailer. See the illustration below.

→ At the end of the trailer, there needs to be 15 cm of empty space for docking purposes.

Let's make your shipments to Amazon a success.
